FASTER THAN EVER ... D-VICE FLASH DRIVES

SUPER SPEED (3.0)

This year we have added NEW flash drives with the very latest 3.0 technology to our range.

USB 3.0 uses new technology, which makes it incredibly fast, at least ten times faster than 2.0 technology.

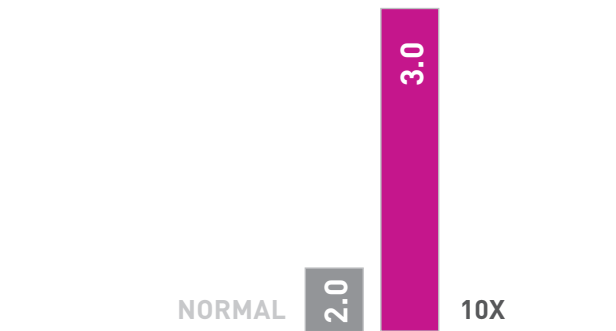

This means the speed at which the data moves between drive and host computer is as fast as 3.2 to 4 gigabit per second / upload / download. So if you need very fast speed and move a lot of 'heavy-duty' data this is the drive for you!

A-GRADE QUALITY

All our flash drives utilise high quality memory. This means no failures and extremely reliable flash. So your client or prospect will receive a drive from you which they will keep and be reminded of your brand rather than throwing it away (as cheap drives often fail in use) which is a common occurrence with cheaper / low grade drives.

All prices for flashdrives are on request due to the nature of flash memory.

NEW

2860 USB FlashDrive Speed 3.0

- No faster flash drive...
- A-grade quality flash
 - USB 3.0

Size: 59 x 17 x 7 mm
Imprint: 48 x 14 mm
