CO2 PEDOMETER

Be aware of the Co2 emission in this world. The ECO Co2 pedometer measures calories burned, distance travel, target steps and most of all the Co2 reduced by walking more instead of using vehicles for transport. Activities like driving a car creates a certain amount of Co2 from the engine burning fuel, depending on the fuel consumption and driving distance it is one of the reason the environment is being damaged. The ECO Co2 pedometer will be your first step to monitor and reduce your carbon footprint (Co2) with a new approach.

2 PCS WOODEN TEA PENCILS

Tea branches.

Tea cultivation was established in Sri Lanka over a century by the colonial British and is still produced year round as a major export crop. Tea bushes are maintained in a standard length by pruning periodically and at times the older trees are uprooted to plant new. The tea estates of Deep Central Uva, a rural province in Sri Lanka provide us all their throwaway tea branches to make pencils. The paper for the box is out of post consumer waste paper and tea refuse. No trees/branches are cut for the purpose of making this pencil. An environment friendly product.

16,7 x 6,2 x 2,2 cm

PP - SP

10.621.200

SCREEN PRINTING

This is the method for labelling textiles, plastic and paper products. Logos ranging from a few centimetres up to half a meter may be prepared by this method. The logo should be broken down into colours and applied to film and then clichés should be prepared. This film provides the basis for the screen. A light-sensitive material is applied to the fine-woven canvas screen, and the

TATTOO

THE CERTIFICATED MASTER OF BRANDING

EXCELLENT SERVICE PROVIDER

light is screened off by means of the silk screen. The area where the path of light caught the dark film remains washable by the silk screen and the paint is leaked onto the textile surface. All products are treated with high temperature to make sure the logo becomes durable.

AP731464
